

Replace
the pain.
Relive
your life.

Joint pain affects us in everything we do. Simple everyday actions like walking, sitting and even standing become big tasks. When the pain is unbearable, causing major discomfort and disability, joint replacement remains the only hope.

Through Joint Replacement Surgery, the arthritic or damaged joint is removed and replaced with an artificial joint called a prosthesis, relieving pain and helping you get back on your feet.

The benefits of getting Joint Replacement Surgery at Shree Krishna Hospital

- 550 bed multispecialty hospital serving since 33 years
- Highly experienced and renowned Joint Replacement Surgeons
- State-of-the-art dedicated Operation Theatre for Joint Replacement Surgery
- Fully equipped Physiotherapy unit with well trained Physiotherapy personnel for post operative care.
- NABH accredited blood bank and NABL accredited Laboratory
- Shree Krishna Hospital is the only hospital in periphery to offer surgery with Autologous Blood Transfusion (the patient's own blood can be used in the pre-planned surgery, minimising complications or side effects arising out of a blood transfusion by another donor)
- Joint Replacement surgeries with FDA approved patient specific implants
